

KAVINDU HARSHANA

Full-Stack Software Engineer | DevOps

Sharjah, UAE | +971 56 298 2733 | kythonlk@gmail.com | kythonlk.pages.dev | linkedin.com/in/kythonlk | github.com/kythonlk

PROFESSIONAL SUMMARY

Full-stack software engineer with 6+ years of professional experience building and maintaining production web, mobile, and internal business applications. Current responsibilities extend beyond development into DevOps, server administration, deployments, and production infrastructure, including hands-on ownership of compromised websites, malware removal, security hardening, and vulnerability remediation. Completed the CPTS certification through Hack The Box, currently working toward OSCP, and completing a BTEC HND in Computing with Cyber Security in September 2026. Looking for a role that combines software engineering, DevOps, infrastructure, and practical cybersecurity.

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer | DevOps | Extra Co Group

September 2023 to Present | Sharjah, UAE (On-Site)

- Develop, secure, deploy, and maintain multiple production web, mobile, and internal business applications, working across architecture, backend and frontend development, APIs, databases, and production support.
- Lead a 3-member development team as technical lead while staying hands-on with development, architecture, and deployment.
- Maintain production infrastructure in Dubai: 3 Windows servers, Check Point firewall infrastructure, 2 Linux virtual machines, and 1 cloud production server, including updates, troubleshooting, and security.
- Manage Linux production environments using Docker, CI/CD, Portainer, CloudPanel, and Git.
- Took ownership of compromised production websites, including extraco.ae, albadr.ae, and fixperts.ae, performing malware removal, security hardening, and restoration; rebuilt and maintained WordPress platforms with a focus on security and performance.
- Built and maintain business-critical internal systems, including the Extra Co Cashier Software, a visa management system covering HR, PRO, and management workflows, and CRM and ERP modules with payment gateway integrations.
- Developed and maintain the Fixperts customer mobile application, along with production websites including goc.ae and terracoreme.ae, focused on performance, SEO, and security.
- Primary stack: Go, React, Next.js, React Native, TypeScript, JavaScript, PHP, Python, PostgreSQL, MySQL, MSSQL, MongoDB, Docker, and Linux.

Software Engineer | Dhabione

February 2023 to September 2023 | Abu Dhabi, UAE (On-Site)

- Took full ownership of a low-performing e-commerce platform as main developer, responsible for engineering, optimization, and ongoing improvements.
- Improved website performance, stability, and scalability using WordPress, React, and Next.js; supported SEO and Google Ads driven improvements.
- Built internal dashboards and tools in Python and React for bulk product imports, pricing analysis, sales analytics, delivery management, and stock management.
- Worked directly with business stakeholders to translate operational requirements into technical solutions.

Associate Software Engineer | Iclick Online Technology / Lead Lanka International

July 2022 to February 2023 | New Zealand (Remote)

Web Developer | Cyber Concepts Sri Lanka

August 2021 to June 2022 | Dehiwala, Sri Lanka (On-Site)

Trainee Web Developer | SATASME Holdings Pvt Ltd

January 2020 to December 2021 | Avissawella, Sri Lanka (Hybrid)

CYBERSECURITY EXPERIENCE

Practical security experience built alongside software engineering and infrastructure work, not as a full-time security role:

- Production website security, malware removal, and compromised-site recovery

- WordPress security hardening and vulnerability remediation
- Web application and API security
- Linux server security and Windows server administration
- Check Point firewall infrastructure and network security
- Docker and production environment hardening
- Penetration testing labs and CTF participation through Hack The Box

HACK THE BOX / CTF ACHIEVEMENTS

Hack The Box, current UAE ranking: #9. 186 points, 24 users, 23 systems, 28 challenges, 0 fortresses.

Cyber Apocalypse CTF 2026: Team Captain and MVP. 42 flags solved, 30,925 points, overall rank 429.

CERTIFICATIONS & EDUCATION

- Certified Penetration Testing Specialist (CPTS), Hack The Box, Completed
- Offensive Security Certified Professional (OSCP), OffSec, In Progress
- BTEC HND in Computing, Cyber Security, Pearson UK / ESOF Metro Campus, Completing September 2026
- DevOps, Docker, AWS and CI/CD, LinkedIn Learning
- Advanced JavaScript, Udemy
- WordPress Development, LinkedIn Learning

TECHNICAL SKILLS

Programming Languages: Go, TypeScript, JavaScript, Python, PHP, C#, .NET

Frontend: React, Next.js, React Native, Tailwind CSS, Shadcn, MUI

Backend: Go, Node.js, Express, REST APIs, WebSockets, WebHooks, GraphQL, PHP

Databases: PostgreSQL, MySQL, MSSQL, MongoDB, SQLite

DevOps & Infrastructure: Docker, CI/CD, GitHub Actions, Linux, Windows Server, AWS, Cloud Servers, Portainer, CloudPanel, Git, Virtual Machines

Network & Security: Check Point Firewall, Web Application Security, Vulnerability Assessment, Security Hardening, Malware Remediation, WordPress Security, API Security, Penetration Testing

Systems: POS Systems, CRM, ERP, Payment Gateway Integrations, Internal Business Applications

SELECTED PROJECTS

Dubai Tuskers (dubaituskers.com)

- Rugby club website with custom CMS functionality and performance optimization.

Flymax Global (flymaxglobal.com)
